### Message from the Guest Editors

Dear Colleagues,

Artificial reproductive techniques were first used for the propagation of livestock species more than seventy years ago. The most widely applied procedure is artificial insemination; however, several species-specific differences must be accounted for in this process (source of semen, insemination techniques, etc.). Furthermore, the sheep and swine industries face remarkable challenges in improving the treatment protocols and techniques included in the ART processes to achieve as high a merit as in the dairy cattle sector. The usage of alternative minimal or non-invasive techniques are also in high demand, in order to meet the expectations of recent animal welfare and ethical concerns. Apart from the profit-oriented utilization of these methods, there is a growing interest in using them for gene conservation and gene banking purposes too.

This SI therefore invites submissions addressing research related to the current status and future outlook of reproductive physiology, medicine and management to achieve practical applications for sheep and pig breeders, producers and people working in the field of gene conservation in future. All types of articles are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
