Message from the Guest Editors

Dear Colleagues,

Research on autonomous vehicles and machinery in agriculture is rapidly evolving, and various legislative and technical approaches are being taken. However, the definition of autonomous or automated vehicles is yet to be established worldwide, as the current standards and regulations do not provide for it. Within this heterogeneous framework, the forthcoming update of the ISO 18497/2018 standard adds to the uncertainty in the field.

This Special Issue aims to present innovative scientific articles, reviews, communications, brief reports, case reports, short notes, and technical notes to share the scientific, planning, engineering, regulatory, and legislative trends that are uncertain globally. The developed solutions mainly focus on mechanical weeding and spraying along the crops' rows. Therefore, cutting-edge research is necessary on further autonomous and automated agricultural machinery applications, technical aspects, and regulatory and safety concerns.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
