Soil Science and Agricultural Chemistry Area, Plant Biology and Soil Science Department, University of Vigo, Ourense Campus, Science Faculty, 32004 Ourense, Spain

Dr. Diego Soto Gómez

Department of Agricultural Engineering, Technical University of Cartagena, Paseo Alfonso XIII, 48, 30203 Cartagena, Spain

Deadline for manuscript submissions:

closed (20 February 2023)

Message from the Guest Editors

We are launching a Special Issue about the interactions among pollutants and nutrients in the soil–rhizosphere–plant system. The rhizosphere is a hot spot of interactions and transformations in the soil–plant system. The occurrence of pollutants in this part of the system is very common. Studies on pollutant occurrence, nutrient pools and their sources, pollutant effects on microorganisms, and introducing innovative techniques to reveal the functioning of the rhizosphere are still needed to decipher the soil–plant system.

Therefore, in this Special Issue we call for research manuscripts focused on:

1. Monitoring the natural occurrence of pollutants and nutrient pools in the plant–soil system;
2. Deciphering nutrient and pollutant sources and pathways in the rhizosphere;
3. Introducing innovative and/or combined techniques to decipher processes in the rhizosphere;
4. Addressing bioavailability in the soil–rhizosphere–plant system;
5. Nutrient and pollutant interactions in the rhizosphere: effects and changes in soil microbiology.

an Open Access Journal by MDPI

Australia

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
