### **Message from the Guest Editors**

Dear Colleagues,

Non-destructive testing technology refers to the use of light, sound, electricity, magnetic and other technologies to detect the physical and chemical properties of the sample without damaging the properties of the sample to be tested.

This Special Issue focuses on the development of nondestructive testing methods and equipment for agricultural products, as well as intelligent processing methods for agricultural products based on nondestructive testing technology. This Special Issue on nondestructive testing technology will include interdisciplinary studies embracing agriculture with disciplines of biology, chemistry, physics and mathematics and engineering. Research articles will cover a broad range of agricultural products, including vegetable, fruits, cereals, livestock and poultry, aquatic products, crops, etc. All types of articles, such as original research, opinions, and reviews are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
