submissions:

closed (15 September 2023)

Message from the Guest Editors

The aim of this Special Issue is to gather recent advances in the feeding, breeding and production of insects of economic value, from pollinators to insects used for biocontrol, and species bred for animal and human nutrition, including bioconverting insects used for the waste management and valorisation of by-products from the agri-food chain.

This issue will embrace multidisciplinary studies reporting the latest findings on insect management and breeding from a variety of perspectives, including nutrition, life cycle, productive performance, health, pathogens, and toxicological studies. It will include both field and in vitro rearing studies on small and large scales. This Special Issue invites all types of articles, such as original research, opinions, and reviews.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
