## Cover Crops - Series II

Guest Editors:

**Prof. Dr. Roberto Mancinelli**

Department of Agriculture and Forest Sciences (DAFNE), University of Tuscia, 01100 Viterbo, Italy

**Dr. Sara Marinari**

Department for Innovation in Biological, Agro-food and Forest systems DIBAF, Tuscia University, Tuscia, Italy

**Dr. Emanuele Radicetti**

Department of Chemical, Pharmaceutical and Agricultural Sciences (DOCPAS), University of Ferrara, 44121 Ferrara, Italy

Deadline for manuscript submissions:

**closed (25 April 2023)**

### Message from the Guest Editors

Modern intensive farming based on high fertilizer rate and agrochemical applications may severely impact the sustainability of cropping systems with increasing problems of reduced soil fertility, loss of biodiversity, soil compaction, and soil erosion. Cover crops could be considered any plant species that are cultivated in the period between two main cash crops, with the main aim to protect soil and support the sustainability of agroecosystems. Although cover crops are becoming more accepted by farmers, many still perceive them to be expensive and complicated in terms of implementing cover crops with agricultural practices. Therefore, there is a growing need of knowledge regarding their establishment, management, benefits, and utility in different agroecosystems.

The main objective of this Special Issue is to collect original research papers or reviews that report on the benefits obtained from the adoption of cover crops and that address the practical problems derived from their utilization under different agro-environmental conditions. To achieve this goal, the submission of relevant articles is welcome and encouraged.

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
