Message from the Guest Editors

Dear Colleagues,

Climate change represents multi-factorial challenges to all aspects of global food security. From a physical perspective, extremes in water availability, temperature and extreme events will impact production capacity as well as nutrition, safety and distribution. From a biological perspective, rising levels of carbon dioxide and an uncertain climate will alter populations of known agronomic pests, including weeds, insects and disease. Such pest pressures impose an additional set of challenges, from production and quality, as well as pest management. Overall, the threat from climate, in relation to other threats, including conflict and COVID, poses an unprecedented challenge for all aspects of food availability, and we warmly welcome manuscripts that touch on all relevant issues.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
