Message from the Guest Editor

The aim of this special issue of the Journal Agriculture is to publish scientific news related to improving of the sustainability in agricultural land use. Sustainability is related to specific matters as quality management, diversification in agriculture and horticulture, land use planning, farming system, environmental protection, poverty reduction, income of farmers, market acceptance, etc. In this issue the focus is related to improve the sustainability by improving of the Soil quality characteristics separated in three categories: physical, chemical and biological. Of high relevance for improving of all three characteristics, is the content of organic matter and the C: N ratio. Lack of organic matter in soils is often a problem in many regions in the world, especially if monoculture is common practice. Collecting of organic wastes in the municipalities, households and farms for composting in order to supply the soil with composts is from growing importance. Very important is a strategy of environmental friendly use of organic fertilizers for securing a stable and economically sufficient yield.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
