Message from the Guest Editor

Perennial grains and oilseeds have become an active area of research world-wide. The release of cultivars in two species (perennial rice and intermediate wheatgrass) is the beginning of the realization of the potential of this broad research area. This has also led to agronomic research, food quality/food science, ecosystem services, and cropping system research into these potential crops alongside the continued breeding of the released crops and/or domestication of new crops.

This Special Issue intends to highlight the scope, progress, and promise of current research into this expanding area of agricultural research. All types of original papers, such as original research articles and reviews, are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
