submissions:

**closed (10 November 2022)**

### Message from the Guest Editor

Some of the most important changes that soils have undergone in arid and semiarid regions, where the distribution and intensity of precipitation and wind are irregular, are the consequence of human communities, which have accelerated soil erosion rates and rerouted nutrient flows. When land use changes, along with the fragility of the soil (low levels of organic matter, aggregate stability and nutrients), these regions become very prone to water generation or wind erosion. These processes move enormous amounts of soil, with a consequential ecological imbalance. In this framework, soil erosion, by itself and also in its overriding role in desertification, has become a matter of public concern and intense research.

The Special Issue should present the main studies carried out with the purpose of providing an overview of the key factors and processes influencing soil erosion processes, examining the achievements and main challenges in erosion prediction, identifying major gaps in knowledge and recommending further research oriented towards the mitigation of soil erosion and its negative impacts.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
