# The Role of Agriculture in Climate Change Adaptation and Mitigation

### Message from the Guest Editors

Our planet is home not only to humans, but to animals and plants too; however, today, we are all faced with global threats that have been caused exclusively by humans. Humankind impact our planet in every possible way, both positively and negatively. A threat we are all familiar with is climate change, which has many faces. Agriculture, a fundamental human activity that produces basic human needs and goods, is extremely vulnerable to the negative effects of climate change. The vulnerability of agricultural production refers not only to basic crop/food/feed production, but its widespread influence on every sector and activity, including social, economic, political, human health, etc. Increases in resource consumption, human population growth, and the application of unsustainable production practices are the factors causing unprecedented levels of human-induced environmental, land, and soil degradation. Today, more than ever, the global community has the obligation to contribute at every level, local, regional, and global, to mitigate and adapt to the negative effects of climate change. Agriculture and climate change have a causally consequential relationship.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
