

## Special Issue

# Anaerobic Fermentation of Agricultural Waste and Sustainable Bioenergy Recovery

### Message from the Guest Editors

In the face of growing demand for renewable energy sources and the need to reduce greenhouse gas emissions, the anaerobic fermentation of agricultural waste is becoming a key technology supporting sustainable development. Agriculture, as one of the largest producers of organic waste, has enormous potential to convert these materials into biogas and other useful products in an environmentally friendly way. This Special Issue aims to bring together the latest research and examples of implementations that are part of the global energy transition and the development of a circular economy. It welcomes original research articles, literature reviews, case studies, implementation analyses, reviews and policy-related articles. Topics of particular interest include, but are not limited to, the following:

- Co-fermentation;
- Anaerobic digestion;
- Agricultural waste;
- Sustainable bioenergy recovery;
- Innovative technologies;
- Fermentation process modelling;
- Biogas yield optimisation;
- Post-digestion management.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
