

## Special Issue

# Greenhouse Gas Emissions in Livestock Production

### Message from the Guest Editors

The expected increase in meat and dairy product consumption due to population growth makes livestock housing, as a source of gaseous emissions, an increasing concern, due to its contribution to climate change. The generation rates of this kind of pollution vary with a number of variables such as outside climate conditions, housing systems, livestock building structure and equipment, ventilation systems, manure handling systems, growing cycles, animal diets, animal species, and farmer's barn management. Therefore, it is of high scientific relevance to investigate those relations and improve strategies for reducing GHG emissions from livestock buildings by applying smart farming technologies. This Special Issue welcomes original contributions from researchers, including reviews and original research, that apply innovative methods and technologies, and address issues of scientific relevance in the following broad areas: measurement techniques, protocols, and methodological frameworks regarding the quantification of GHG emissions from livestock systems; methods, techniques, and strategies for reducing GHG emissions from livestock production systems

---

### Guest Editors

Prof. Dr. Claudia Arcidiacono  
Dr. Sabrina Hempel  
Providence Rita D'Urso

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

---

### Editor-in-Chief

Prof. Dr. Les Copeland  
Sydney Institute of Agriculture, School of Life and Environmental  
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
