Message from the Guest Editors

Dear Colleagues,

We are pleased to announce the Special Issue "Novel Methods for Food and Agricultural Products Preservation" in the scientific journal *AgriEngineering*. The Special Issue focuses on exploring new methods for preserving food and agricultural products in response to the increasing demand for fresh, safe, and environmentally friendly food. Specifically, we are interested in articles that explore bio-preservatives, active packaging, and eco-friendly and non-thermal technologies, which are emerging as viable alternatives to traditional methods. We hope that this Special Issue will provide a platform for researchers and practitioners to share their findings and insights, and contribute to the advancement of agricultural and food preservation technologies.

Prof. Dr. Mehmet Başlar
