

Special Issue

Novel Approaches for Unmanned Aerial Vehicle

Message from the Guest Editors

This Special Issue is focused on the development in the field of novel aerial vehicle (UAV) uses, applications, advances, data collection, data work, and in all of the themes related to this rapidly improving field. We proudly invite the community of scholars to submit their research from across the spectrum of novel approaches for unmanned aerial vehicles in the area of agriculture, livestock, forestry, rural buildings, rural topography. Contributions could include, but are not limited to, UAV applied in agriculture, unmanned aerial vehicle (UAV) applied in livestock, UAV applied in rural buildings, UAV applied in forestry, UAV spraying applications, UAV seeding applications, UAV LiDAR and photogrammetric systems, remote sensing from UAV images, multispectral imagery, weeds, pests and diseases detection from UAV, spectral data analytics, image processing, vegetation indices, thermal imagery, GHG gas detection from UAV and UAV design for agricultural uses. Dr. Gabriel A.e.S. Ferraz

Guest Editors

Prof. Dr. Gabriel Araújo e Silva Ferraz

Department of Agricultural Engineering, School of Engineering, Federal University of Lavras—UFLA, P.O. Box 3037, Lavras 37200-900, Brazil

Dr. Giuseppe Rossi

Department of Agriculture, Food, Environment and Forestry (DAGRI), University of Florence, Via San Bonaventura 13, 50145 Florence, Italy

Deadline for manuscript submissions

closed (1 February 2022)

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, FSTA, AGRIS, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Agricultural Engineering) / CiteScore - Q1 (Horticulture)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.8 days after submission; acceptance to publication is undertaken in 5.5 days (median values for papers published in this journal in the first half of 2024).
