submissions:

30 September 2024

Message from the Guest Editors

Knowledge of the ecology of insects, mites, vertebrate and invertebrate pests, weeds, and phytopathogens is one of the pillars of integrated pest management. Pests should be understood as populations that are out of balance and cause economic losses. Ecological knowledge about these populations is crucial for longer-lasting pest management with reduced environmental and social impact. The diversification of agroecosystems, agroforests, biological control, the push-pull technique, the sterile insect technique, and the search for selective agrochemicals within an area-wide approach depend significantly on this ecological knowledge. This Special Issue invites the submission of original research articles and reviews to deepen ecological aspects as a basis for future integrated pest management, such as demographic traits, ecology and evolution of behavioral patterns, population dynamics, diversity, abundance, trophic relationships, host range and status, natural enemies, niche, distribution modeling, phytosociology, allelopathy, competition, absent quarantine pests, and epidemiology.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
