Deadline for manuscript  
submissions:

**15 December 2024**

### Message from the Guest Editors

Dear Colleagues,

Global climate change, which has shown a significant rate of acceleration in the last 20 years, results in very important changes in the biology of weeds, their associations, and the development of their damage in all agricultural zones of the Earth. Adapting to the changing environment, new plant biotypes appear and become significant pests in some areas. Nowadays, one of the biggest challenges of agricultural and forestry activities is adapting to climate change through the implementation of effective weed control.

The latest weed control research directions already take into account the trends in the reduction in the active ingredients of classic herbicides, the growing problems of herbicide resistance, and the growing environmental protection expectations.

We seek integrative studies that present the biological, physiological, and associative changes of significant weed species and plant communities due to climate change, as well as reviews that offer original perspectives on the development of weed management of major crops.

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
