**Prof. Dr. Pedro Palencia**

Department of Organisms and Systems Biology, Polytechnic School of Mieres, Oviedo University, Mieres, 33600 Asturias, Spain

Deadline for manuscript submissions:

**closed (10 August 2024)**

### Message from the Guest Editors

Small fruits are recognized for their abundant supply of various minerals and vitamins. These fruits are packed with diverse phytochemicals with antioxidant effects that have a strong association. In addition to their health advantages, berries produce numerous bioactive compounds as a protective response to abiotic factors and pest-related stress, contributing to the overall development and ripening of the fruits. Hence, the quality of small fruits is influenced by various production systems.

This Special Issue will primarily address the physiology of small fruits, including the biosynthesis, accumulation, and bioavailability of bioactive compounds. Additionally, it will explore various aspects of production systems such as yield optimization, cover cropping, organic farming, controlled environment agriculture, and hydroponics. The management of small fruits, encompassing integrated pest management, botanicals, biostimulants, and stress factors, will also be emphasized. Consequently, we invite the submission of original research articles and reviews that specifically delve into these areas of interest.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
