Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editor

Crop production systems constitute the largest terrestrial biomes in many regions. These agricultural landscapes—which provide food, fibers and other materials for human societies—are also habitat for diverse arthropod communities. The arthropods that are capable of tolerating agricultural landscapes include herbivores and their natural enemies; however, synanthropic arthropods also provide other essential ecosystem services, such as weed control, pollination and decomposition. This Special Issue will examine the benefits for human societies from arthropods in agricultural systems. In particular, this Special Issue aims to quantify these services at regional or global scales. Papers that describe arthropod services at field scales, or that describe agroecological approaches to optimize these services, are also welcome. Papers can encompass any arthropod group and any crop production system. Papers may focus on provisioning (e.g., silk, honey), regulating (e.g., pest and weed regulation, biological control) and/or cultural services, as well as underlying supporting services. Papers based on stakeholder surveys are also welcome.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
