Deadline for manuscript
submissions:

closed (15 March 2021)

Message from the Guest Editor

In recent decades, livestock production has increased worldwide and it is expected to keep developing in a growing population scenario. Genetics, feeding, and management played roles in this livestock revolution, but housing design and operation have been crucial to adapt livestock houses to new demands. Nevertheless, there is an increasing pressure on livestock production to ensure welfare, sustainability, and efficiency goals that must be addressed from all perspectives. Please share your success stories from research in the design and control of livestock houses around the world in this Special Issue. Submissions on the following topics (but not limited to) are invited: 1) Optimization of ventilation systems to reduce energy demand; 2) Innovative systems and management of cooling systems in hot climates; 3) Use of alternative energy sources for heating; 4) Advanced techniques, such as precision livestock farming, for management optimization; and 5) Decision support tools and modeling.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
