Rzeszów, Poland

Dr. Małgorzata Szostek

Department of Soil Science,
Environmental Chemistry and
Hydrology, College of Natural
Sciences, University of Rzeszów,
35-601 Rzeszów, Poland

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

Conservation agriculture (CA) may be the answer to these threats. CA is a crop and soil management practice for sustainable agriculture, defined by three related principles: minimum tillage and soil disturbance, permanent organic soil cover, and diversified crop rotations. Adherence to these principles improves soil quality, optimizes yields, and reduces production costs. Conservation practices help minimize soil erosion, directly increase CO₂ sequestration in the soil due to increased organic matter, improve the efficiency of water capture and use, stimulate internal C and N cycling, and mitigate greenhouse gas emissions. CA's success is driven by component technologies such as water, weed, and nutrient management strategies to support crops under reduced tillage conditions.

Our aim is to present agricultural practices that combine high production of quality raw materials with the provision of environmental services.

Both original research and review articles are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
