Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on all topics related to the sustainable management of herbaceous field crops, with a major emphasis on the choice of plant species and genotypes (traditional and improved), as well as on agricultural practices (soil tillage, fertilization, irrigation, weed control, and organic farming) able to both ameliorate crop productivity and safeguard agroecosystems. The impact of such agronomic aspects on the product quality of herbaceous field crops will also be considered. All types of articles, such as original research papers, communications and short notes, and reviews on the abovementioned topics are welcome.

Prof. Dr. Giovanni Mauromicale
Dr. Sara Lombardo

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
