Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

Dear Colleagues,

In order to present the recent advances on molecular responses to and management strategies for crop stress and to stimulate fruitful discussions, the outstanding journal **Agronomy** (JCR, Q1) is organizing this Special Issue, which will focus on molecular responses to and management strategies for crop stress. Manuscripts related to crops' responses to biotic and abiotic stresses at the molecular level and the management of strategies for crop stress are welcomed and encouraged for submission to the Special Issue, especially these manuscripts that report findings or advances on the employment of CRISPR-cas9 gene editing; RNAi; traditional transgenic techniques; and microbiome tools to improve the performance of wheat, rice, maize, tomato, soybean, or rape seed under abiotic stress conditions such as heat, cold, salinity, flooding, low oxygen, nutrient deficiency, low pH, heavy metals, and biotic stress conditions, for instance, pathogens and pests. In short, any manuscript worldwide related to the topic of the Special Issue is welcomed.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
