2. Key Laboratory of Biology and Germplasm Enhancement of Horticultural Crops in East China, Ministry of Agriculture, College of Horticulture, Nanjing Agricultural University, Nanjing 210095, China

Deadline for manuscript submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

Abiotic stresses induced by climate change and global warming have a negative impact on crop development, growth and ultimately production. The production of crops and vegetables, especially at the reproductive stage, is sensitive to abiotic stresses. More importantly, several stress conditions usually occur co-currently. The response of plants to combined stress cannot be assumed from their response to individual stress, therefore, it is urgent to improve their climate resilience, especially drought and heat tolerance, and clarify the tolerance mechanisms.

The aim of this Special Issue is to collect important results and findings on plants' responses to environmental stress, especially from the perspectives of plant physiology, metabolism and genetic regulation. We welcome submissions of cutting-edge knowledge on the effects of multiple stress to crops and vegetables.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
