Deadline for manuscript submissions:

closed (31 December 2020)

Message from the Guest Editor

Dear colleagues,

Plants are a great source of natural compounds, many of them with a biological importance as antioxidants, anti-inflammatory, antimicrobial, anti-cancer, etc. Many of these plants and their extracts, are commonly used in agri-food, pharmaceutical or agrochemical industries. The techniques of extraction of natural compounds in plants are used with a double purpose: (i) to extract compounds for the analysis of the content of natural compounds in plant matrix; (ii) to extract and obtain extracts rich in these natural compounds.

This special volume will focus on the extraction, identification, analysis and use of natural compounds present in plants. We welcome novel research and reviews covering all related topics in extraction methods of natural compounds in plants (UAE, MAE, PLE, SFE, etc.), identification and analysis of natural compounds in plants, the obtaining and the usage of plant extracts, the use of by-products from the agri-food industry and, the quality control.

Dr. Gerardo Fernández Barbero

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
