

Innovative Research on Rice Breeding and Genetics

Guest Editors:

Dr. Zhijuan Ji

China National Center of Rice Improvement, China National Rice Research Institute, Hangzhou 311400, China

Dr. Yongqi He

The Laboratory of Seed Science and Technology, South China Agricultural University, Guangzhou 510642, China

Deadline for manuscript submissions:

15 September 2024

Message from the Guest Editors

Rice is an important food crop worldwide and is a major target of breeding efforts seeking to improve both agricultural production and nutritional quality to meet human demand for food. The development of germplasm resources and advances in breeding methods have led to steady increases in the yield and quality of rice. In particular, the development of hybrid rice has greatly contributed to ensuring food security globally. Hybrid rice breeding includes the three-, two-, and one-line methods. The one-line method of hybrid rice breeding fixes heterosis through apomixis with the ability to reproduce in the absence of fertilization.

This SI focuses on rice breeding methods, the creation of germplasm materials, genetics and genomics, biotic and abiotic stress, but is not limited to these topics. This Special Issue welcomes reviews, regular research papers, communications, and short notes.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
