

The Future of Agriculture: Towards Automation

Guest Editor:

Prof. Dr. Claus Grøn Sørensen

Department of Electrical and
Computer Engineering, Aarhus
University, 8000 Aarhus, Denmark

Deadline for manuscript
submissions:

closed (15 July 2021)

Message from the Guest Editor

In this Special Issue, we are open to contributions (research papers and a limited number of reviews) exploring the advancement of innovative automation for smart farming, including agri-food supply chains. This includes both the physical development of automation technologies and system engineering, including how technology affects and changes the whole production system, and how technology is part of ongoing sustainability efforts. In addition, studies on the integration of automation with the advent of digitalization and the identification of incentives and barriers for the adoption of automation technologies are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
