Message from the Guest Editor

Dear Colleagues,

Oilseed crops include soybean, the group of brassicas (rapeseed, canola, mustards), sunflower, groundnut, cottonseed, maize, linseed, sesame, safflower, castor, and other minor crops. Human population growth coupled with the improvement in the standard of living has led to a continuous increase in seed oil production, from around 12 Mt in the early 1960s to more than 100 Mt at present. This trend is expected to continue in the next years, which will require adopting efficient breeding strategies for not only improving crop productivity, but also crop quality and sustainability. In this sense, modern biotechnologies such as omics technologies, genetic and genome engineering, gene- and genomic-assisted breeding, bioinformatics, and other biotechnological applications derived from synthetic biology are called to play a major role in the genetic improvement of oilseed crops.

This Special Issue will cover methodological and applied research on the development and use of modern biotechnologies for oilseed crops improvement, with emphasis on their potential impact on crop productivity, crop quality, and sustainable production.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
