Deadline for manuscript submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Dear Colleague,

Environmental stress is increasing worries about grapevine response and fruit quality in particular, mostly related to climate change. As a first step, irrigation can be a more immediate tool to face some aspects of this problem, but deep research is required, according to the different environments, varieties and wine styles. Moreover, canopy management can be another interesting tool to moderate or mitigate some effects of environmental stress, more related to the vine microclimate, for which qualitative effects are highly site-dependant and need a wide experimental input to obtain real knowledge for efficient vineyard management.

Dr. Jesus Yuste

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
