

Frost Tolerance and Cold Acclimation of Crops

Guest Editor:

Prof. Dr. Agnieszka Płazek

University of Agronomy of
Krakow, Department of
Physiology, Breeding of Plants
and Seed Science, Podlužna 3,
30-239 Krakow, Poland

Deadline for manuscript
submissions:

closed (30 July 2021)

Message from the Guest Editor

Climate change is causing a long period of warmth in autumn when plants should gradually acclimate to low temperatures, as well as drastic declines in temperature or increases during the winter. Deacclimation proceeds much faster than acclimation, which means that even a few frosty days can cause irreversible losses in winter crops. Scientists now have a new task: to study the response of plants to rapid temperature fluctuations and to analyze the molecular changes occurring in plants as a response to this stress. Therefore, I invite you to send publications to this new Special Issue devoted to these subjects. Field-based research is welcome, including a wide range of research from traditional to the most modern such as proteomic, genetic, and hormonal analyses. I encourage you to share your knowledge through this prestigious journal *Agronomy*. I look forward to receiving your manuscripts.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
