Deadline for manuscript  
submissions:

**closed (25 September 2022)**

### Message from the Guest Editor

Improving the quality of agricultural products can bring significant ecological, social and economic benefits. However, due to the influence of planting, picking, storage, transportation, packaging and other links, the quality of agricultural products will decline. Therefore, the development of non-destructive technology and equipment for agricultural products has become one of the hotspots in the field of agricultural production.

In this Special Issue, we aim to exchange knowledge on nondestructive picking, storage and transportation of agricultural products, thus improving the quality and economic benefits of agricultural products. This is an open call for papers, soliciting original contributions considering recent findings in theory, methodologies, and applications in related scenarios from smart agriculture.

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
