Message from the Guest Editors

Dear Colleagues,

Farmers are called to increase the agricultural sustainability and Organic Cropping System (OCS) has emerged as an alternative to Conventional Cropping System (CCS). Unfortunately, the current yield gap between OCS and CCS is significant for most crops. In this regard, this Agronomy-MDPI Special Issue will deal with several aspects of herbaceous/tree crop cultivation under “Organic vs. Conventional Cropping Systems”. The goal is to give cutting edge useful information that can be used to improve sustainability in the two cropping systems.

We invite experts and researchers to contribute with original researches, reviews, and opinion pieces covering all topics related to the OCS vs. the CCS.

Dr. Enrico Francia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
