Deadline for manuscript  
submissions:

**closed (20 November 2021)**

### Message from the Guest Editor

Knowledge on the interactions of phytoplasmas with their wild host plants acting as pathogen reservoirs and alternative insect vectors could lead to the development of novel and alternative strategies of pest prevention and management, especially in cases in which traditional approaches are in need of adaptation in light of global environmental challenges.

For this Special Issue, we invite you to send contributions related to vector–plant interactions and the molecular epidemiology of phytoplasmas which are essential for the establishment of the innovative disease control strategies.

We are looking forward to your contribution.

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
