Message from the Guest Editor

Rodents are among the major pests that have accompanied human society since time immemorial. Currently, they are frequently associated with fields, orchards, farms, livestock stables, grain stores, food industry facilities, and many other places in the anthropogenic environment. Their harmfulness lies not only in the quantitative damage they cause (crop loss), but also in the risks of transmitting diseases to humans or livestock. *Agronomy* would like to prepare a Special Issue on the topic of Rodents in Crop Production Agricultural Systems, which would include current knowledge and information in the field. The current societal demand for the reduction of chemicals in agriculture also significantly affects rodent control.

We welcome novel research articles, reviews, and opinion pieces covering all related topics including rodent monitoring, control, rodenticides, repellents, attractants, biological rodent control, secondary intoxications, damage caused by rodents in fields and commodity stores, rodent population dynamics, rodent health risks to humans and animals, case studies from the field, and policy positions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
