### Message from the Guest Editors

This Special Issue aims to answer the question about the scope and conditions for the implementation of the concept of sustainable development in the sphere of agriculture, agricultural product distribution, and food consumption. Reduction of the knowledge gap in the scope of the presented issues will be supported by studies on the directions of agricultural development, as well as the strategies and marketing activities of food producers and distributors. Striving for a holistic presentation of the issues raised, articles whose authors also indicate the typologies of consumers of agri-food products and their attitudes towards sustainable development will be very desirable. It would be valuable to look at this issue from the perspective of individual types of agricultural products and the experiences of various countries.
