

## Special Issue

# Selected Papers from 38th National Irrigation Congress

### Message from the Guest Editors

Population growth, urbanization, climate change and environmental degradation are placing unprecedented pressure on water resources, with a particular impact on irrigated agriculture. Resolving the challenges of the future requires a thorough reconsideration of how water is managed for agricultural supply and crop irrigation. This question is annually addressed in the Spanish National Irrigation Congress series, which brings together Spanish and Latin American researchers and technicians to present and discuss innovations, trends, and solutions for irrigation agronomy and engineering. In this Special Issue, selected papers from the 38th edition of the congress will be considered for publication on the main topics, including: irrigation strategies, methods and technologies; modeling and simulation tools; water–soil–plant–atmosphere relationships; salinity and drainage; environmental impacts; reclaimed and desalinated water for irrigation; effects of irrigation water quality on the soil, crops and aquifers; irrigation infrastructure; water–energy nexus; economic viability assessment.

### Guest Editors

Prof. Dr. Victoriano Martínez-Alvarez  
Dr. Belen Gallego-Elvira  
Dr. Martín Eduardo Espósito

### Deadline for manuscript submissions

closed (1 June 2022)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
