

Special Issue

Microbiology in Agroecosystems: Microbial Community Abundance and Diversity

Message from the Guest Editor

In this context, in this Special Issue we encourage submissions that make a substantial and up-to-date contribution to the study of microbial communities in environmental ecosystems, more specifically in agrosystems, and addressing either fundamental or applied issues. Manuscripts dealing with the study of microbial diversity using culture-dependent and culture-independent methods, changes in the structure and function of microbial communities under environmental stresses (interaction with biotic and abiotic factors), environmental adaptations including biodegradation and bioremediation, the impact of agricultural practices on non-targeted microorganisms, and the use of microbes as bioindicators for risk assessment are encouraged, as well as others topics that could fit within the theme of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
