Deadline for manuscript submissions:
closed (31 August 2023)

Message from the Guest Editor

Dear Colleagues,

Nonsmooth optimization problems cover various real-world applications. In this Special Issue of "Recent Advances in Nonsmooth Optimization Analysis", we are open for contributions presenting the theory and numerical methods that can be modeled for solving nonsmooth optimization and real-life problems.

We welcome innovative submissions from all areas of Nonsmooth Optimization, including Convex and Generalized Convex Optimization, with an emphasis on algorithms for solving such problems, with or without practical applications.

Dr. Sorin-Mihai Grad

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.
Journal Rank: JCR - Q2 (*Computer Science, Theory and Methods*) / CiteScore - Q1 (Numerical Analysis)
