

Identification and Analysis of Dynamic Structures in Complex Systems: Algorithms and Applications

Guest Editors:

Prof. Dr. Marco Villani

Department of Physics,
Computer Science and
Mathematics, University of
Modena and Reggio Emilia,
41125 Modena, Italy

Prof. Dr. Stefano Cagnoni

Dipartimento di Ingegneria
dell'Informazione, Università
degli Studi di Parma, Parco Area
delle Scienze 181/a, I-43100
Parma, Italy

Message from the Guest Editors

This Special Issue aims to foster discussion on the dynamics of complex systems from an algorithmic viewpoint, emphasizing the detection of relevant integrated structures or subsystems and the understanding of their relationship with the dynamics of the whole system (and its environment). The Special Issue welcomes papers that highlight relationships between algorithms applicable to such problems and methods, derived from them or being their extensions, that can be applied more widely to other fields, such as data analysis, machine learning, and pattern recognition.

Deadline for manuscript
submissions:

Germany

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compindex, and other databases.

Journal Rank: JCR - Q2 (*Computer Science, Theory and Methods*) / CiteScore - Q1 (Numerical Analysis)
