New Advances in Securing Data and Big Data

Guest Editors:

Dr. Meena Jha

Dr. Kewei Sha

Dr. Otmane Azeroual

Deadline for manuscript submissions:
closed (31 January 2022)

Message from the Guest Editors

We invite you to submit high-quality contributions to this special issue on "New Advances in Securing Data and Big Data", the topics of which cover the entire range from theory to application:

- Data Quality
- Big Data
- Artificial Intelligence Algorithms
- Data Mining and Text Mining
- Scientific Knowledge Graph
- Securing Big Data
- Big Data Processing and Analytics
- Modeling data and Process Quality
- Machine learning for Data Analysis

Special Issue

Editor-in-Chief

Prof. Dr. Frank Werner
Faculty of Mathematics, Otto-von-Guericke-University, P.O. Box 4120, D-39016 Magdeburg, Germany

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.
Journal Rank: JCR - Q2 (*Computer Science, Theory and Methods*) / CiteScore - Q1 (Numerical Analysis)
