### Message from the Guest Editors

Dear Colleagues,

The human population is in constant growth, a phenomenon which generates a constant need for protein sources at a high environmental cost. This process of finding more efficient production systems which are also cheap and environmentally friendly, combined with climate change, constitutes a major challenge to the scientific community and humanity more generally. Sheep and goat are species with great production potential that are commonly managed in rangelands with few resources. This overview represents an opportunity area to increase the knowledge of small ruminant production and finding of new cost-effective, environmentally friendly, and efficient advances regarding small ruminant management.

We invite you to submit your research for publication. This Special Issue will be a compilation where current research regarding small ruminants will be published, especially regarding ARTs, nutrition–reproduction interactions, socio-sexual behaviors, estrus synchronization, hormonal treatments, social behavior, and milk production, among others.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
