Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to provide a source for high-quality articles related to recent advances in canine and feline laboratory and imaging diagnostics that have led to substantial developments in various fields of veterinary medicine. Areas of interest in this issue include current progress and future perspectives in a variety of topics, including clinical chemistry, endocrinology, hematology, immunology, diagnosis and staging neoplastic, histopathology, and immunohistochemistry/immunofluorescence, as well as new insights into diagnostic imaging.
