submissions:

closed (29 February 2024)

Message from the Guest Editors

Dear Colleagues,

The long history of human interactions with horses developed around the use of horses for transportation, warfare, sports and rehabilitation. Today, we are fortunate in having analytical tools to further our understanding of biomechanical, physiological and psychological aspects of the interactions between people and their horses. New information is informing equine care and welfare and the development of equestrian technique.

This Special Issue will present the most recent advances on the interaction between riders and horses. We are inviting you to submit your latest original research, a systematic or scoping review or a case report on this topic. We would encourage submissions that use robust, novel methods and offer substantial new insights in any field or discipline that involve horse–rider interactions.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
