### Message from the Guest Editors

Dear Colleagues,

Zebrafish (*Danio rerio*) is a small cyprinid native to South Asia that was first popularized as an aquarium pet fish and then became a valuable laboratory animal in biomedical research. Currently, zebrafish is one of the most widely used model organisms, maintained in numerous laboratories worldwide.

For this Special Issue, we are inviting research papers addressing zebrafish husbandry related topics, including but not limited to breeding, embryonic culture, larval rearing, feeding and nutrition, health, welfare and ethical considerations. We also invite articles about environmental maintenance conditions for entire colonies and water systems including temporally limited environmental requirements for experiments on subsets of colony stocks. Review articles about recent advances and insights on these topics are also very welcome.
