Message from the Guest Editors

Dear Colleagues,

Probiotics have been employed as an alternative to antimicrobial growth promoters in swine production due to their ability to improve gut digestion, the immune system, growth performance, and animal health. At the same time, interest in studies concerning the mechanisms of action of substances produced by probiotic bacteria in farm animals has increased. The purpose of this Special Issue is to provide an update regarding the effect of probiotics and substances derived from bacteria on host development. Moreover, this Special Issue aims to include original research papers and reviews in reference to the mechanism of action of probiotics at different stages of a pig's life, addressing both basic and applied science.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
