Message from the Guest Editors

Dear Colleagues,

There are two main goals of reproductive medicine: prevention of pregnancy and improvement of fertility. In food-producing large farm animals, the second one is more important compared to the first, because there is no production without reproduction. However, in horse breeding, during the racing period, contraception is an important task expected by owners. Improvement of fertility results remained the number one target of production animal clinical services. Abortion and premature deliveries caused by infectious (zoonotic diseases) or non-infectious (toxins, steroid disruptors) factors are also very important and have a high human health risk, as well. The diagnosis, treatments, or prevention of all reproductive anomalies/diseases in male and female animals are very important and have economic significance.

This Special Issue therefore invites submissions addressing the current status and future outlook of areas that contribute to the advancement of knowledge and competence in theriogenology, reproductive medicine, and assisted reproduction in horses and food-producing large animals to achieve higher reproductive efficiency in the future.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in 'Agriculture, Dairy & Animal Science'; 13/143 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
