Deadline for manuscript
submissions:

closed (31 March 2024)

Message from the Guest Editor

The recent pandemic of SARS-CoV-2 is just the latest example of how a better understanding of the emergence and maintenance of bat-borne viral diseases is of critical importance. With there being over 1,400 species of bats, covering a wide range of habitats across six continents, a better understanding of the viruses that bats carry and the threats posed by their introduction into other host species is needed. A Special Issue of *Animals* will be dedicated to "Bats and Viruses: Importance of Understanding Virus Origin and Host Connection". We are interested in recent research on the interactions of bats and their environments; the exposure of humans in addition to their companion and domestic animals to bats; the discovery of novel bat viral pathogens; evolution and host adaptation following species cross-over; and the phylogenetic/phylogeographical studies of bat-borne viruses.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
