Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editor

Dear Colleagues,

The production of marine and freshwater fish has been growing worldwide. The different production systems that are used have specific characteristics and require different management. Important aspects of nutrition affect the growth, metabolism, and health of fish at different stages of life, for example, diet quality, water conditions, additives, nutrients, and feed management. Furthermore, several alternative ingredients are being tested in fish diets aiming for greater sustainability and lower costs.

This Special Issue will collect original research findings and reviews on nutritional, environmental, and management aspects that affect the growth, metabolism, and health conditions of farmed fish. Work involving genomics, food quality and additives, micronutrients, as well as the impact of production systems are welcome.

Dr. Rafael Lazzari

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
