Message from the Guest Editor

Dear Colleagues,

This Special Edition of MDPI *Animals: Birds* entitled “Birds Ecology: Monitoring of Bird Health and Populations” invites the results of research focusing on the linking of changing environmental conditions to the condition of birds, as well as review articles summarizing knowledge in this area. A diverse approach to bird health assessment and individual condition assessment reflecting various processes (physiology, immunology, health, molecular markers) which may help to develop methods of monitoring the condition and health of the bird population is extremely important and of interest to this issue. We also invite you to submit papers on the monitoring of the bird population in connection with assessment of their condition.
