Deadline for manuscript submissions: closed (31 March 2022)

## **Message from the Guest Editors**

Dear Colleagues,

Human and non-human animals have traditionally been studied with very different methods, and often with very different aims, and this has been the clear trend in psychological and neuroscientific study of emotion and affective states. Human research has progressed holistically, examining complex psychosocial emotions from a whole organism and whole-brain perspective. In contrast, animal research has more often attempted to clarify granular neurophysiological details linked with circumscribed behavioral states. Fortunately, human research approaches are being increasingly applied to work with animals. We now see an increasing number of animal emotion studies utilizing the psychological and non-invasive systems neuroscience methods typically deployed in human research. The aim of this Special Issue is to encourage such open-mindedness in approaches to studying affect and emotion in non-human animals and to promote interdisciplinary cooperation in these endeavors.

1. Institute of Veterinary Medicine and Animal Sciences, Estonian University of Life Sciences, Kreutzwaldi 1, 51014 Tartu, Estonia 2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.
